

CASE96 - Marshall Court Apartments (4-Story Residential Building)

LEVEL 1

1. Vocabulary Extraction

- Entrance lobby
- Management office
- Public garden
- Units
- Stairwell
- Elevator

2. Quantity Estimation

- Units approximately 6
- Entrance lobby 1
- Management office 1
- Public garden 1
- Stairwell 1
- Elevator 1

3. Spatial Relationship Descriptions

- The entrance lobby is centrally located, providing direct access from the street to the internal circulation corridor.
- The management office is positioned adjacent to the entrance for supervision and accessibility.
- A common public garden lies at the northern edge, acting as a transitional and social buffer between the units and the surrounding environment.

4. Overall Spatial Impression

Level 1 acts as the public interface of the building, combining access, administration, and community functions with a

garden-focused open space to encourage social interaction.

LEVEL 2

1. Vocabulary Extraction

- Units
- Corridor
- Terrace
- Stairwell
- Elevator

2. Quantity Estimation

- Units approximately 7
- Corridor 1
- Terraces 2
- Stairwell 1
- Elevator 1

3. Spatial Relationship Descriptions

- Units are arranged along both sides of a central corridor, facilitating efficient circulation.
- Terraces are positioned at both ends of the corridor, serving as semi-public breakout zones for residents.
- Vertical circulation (stairs and elevator) is centrally placed for accessibility.

4. Overall Spatial Impression

The second floor focuses on efficient residential layout, with units clustered around a central corridor and flanked by terraces to promote neighborly interaction and access to daylight.

LEVEL 3

1. Vocabulary Extraction

- Units
- Corridor
- Terrace
- Stairwell
- Elevator

2. Quantity Estimation

- Units approximately 7
- Corridor 1
- Terraces 2
- Stairwell 1
- Elevator 1

3. Spatial Relationship Descriptions

- Unit distribution mirrors Level 2, maintaining a rhythm of double-loaded corridors with community terraces.
- Circulation core remains unchanged to preserve vertical consistency and efficiency.

4. Overall Spatial Impression

Level 3 reinforces the layout logic of the lower floors, emphasizing modularity and regularity while preserving opportunities for interaction through edge terraces.

LEVEL 4

1. Vocabulary Extraction

- Units
- Corridor
- Terrace

- Stairwell

- Elevator

2. Quantity Estimation

- Units approximately 7

- Corridor 1

- Terraces 2

- Stairwell 1

- Elevator 1

3. Spatial Relationship Descriptions

- Continuation of the corridor-based unit organization with similar spatial zoning and terrace integration.

- Structural and circulation consistency is preserved throughout the building's vertical stack.

4. Overall Spatial Impression

The fourth floor concludes the vertical program of the building with a consistent spatial strategy double-loaded units, end-terrace relief spaces, and centralized vertical movement.
