

CASE97 - Parkside Retirement Homes Analysis

P1 - Architectural Drawings Analysis

Vocabulary Extraction

- Residential Units (1BHK and 2BHK)
- Corridors
- Central Atrium
- Skylight
- Activity Centers
- Stairwells
- Elevators
- Balconies
- Terraces
- Reception Area
- Waiting Lounge
- Common Dining Area
- Kitchen
- Amphitheater
- Water Features
- Plaza
- Temple Connection Path

Quantity Estimation

- Residential Units: Approximately 15-16 units per floor, totaling 156 units over 10 floors.
- Activity Centers: One per floor, totaling 10.

- Stairwells and Elevators: Approximately 2 sets per floor.
 - Balconies: At least one per unit.
 - Terraces: Located on higher levels, primarily on the south side.
 - Reception Area, Waiting Lounge, Common Dining Area, Kitchen, Amphitheater, Water Features, Plaza, Temple
- Connection Path: Primarily on the podium level.

Spatial Relationship Descriptions

- Units arranged around a central atrium for light and ventilation.
- Activity centers next to the atrium for social interaction.
- Podium connects to a temple via a stepped plaza.
- Terraces provide southern views.

Overall Spatial Impression

- Design emphasizes vertical and social connectivity through central atrium and distributed communal hubs.

P2 - Photographs and Renderings Analysis

1. Design Vocabulary Extraction

- Double-Height Volumes
- Colorful Facade Elements
- Cascading Terraces
- Water Features
- Landscaped Plaza
- Atrium Skylight

2. Atmospheric Description

- Bright, vibrant atmosphere with natural light and colorful elements.

- Water features enhance serenity.

3. Spatial Composition or Hierarchy

- Central atrium connects floors vertically.
- Terraces and plaza create communal horizontal spaces.

4. Design Intent Reading

- Promotes senior engagement and accessibility.
- Combines communal and private spaces fluidly.

5. Contextual Relationship

- Opens to temple and airport views, integrating with surroundings.

P3 - Details, Construction, and Diagrams Analysis

- Communal spaces integrated with units.
- Central atrium links floors.
- Vertical social interaction encouraged.

Floor-by-Floor Analysis

Level 1 (Podium Level)

- Vocabulary: Reception, Lounge, Dining, Kitchen, Amphitheater, Water Features, Plaza, Temple Path
- Quantity: 1 each major facility; multiple water features
- Spatial: Hub for activity, connected to temple
- Impression: Community and cultural node

Levels 2-10

- Vocabulary: Units, Activity Centers, Atrium, Corridors, Stairwells, Elevators, Balconies, Terraces
- Quantity: ~15-16 units/floor, 1 activity center/floor
- Spatial: Units around atrium; centers for interaction
- Impression: Blends privacy with social space for seniors
