

CASE98 - Spatial and Architectural Analysis

LEVEL 1

Vocabulary Extraction:

- Grand hallway
- U-shaped staircase
- Skylight
- Home office
- Waiting area

Quantity Estimation:

- Grand hallway × 1
- U-shaped staircase × 1
- Skylight × 1
- Home office × 1
- Waiting area × 1

Spatial Relationship Descriptions:

The grand hallway connects all three levels vertically, establishing a circulation core. The U-shaped staircase is placed centrally under the skylight, enabling both functional and luminous vertical movement. The home office is positioned near the entrance and adjacent to the waiting area, forming a semi-private transition zone.

Overall Spatial Impression:

The basement is functionally anchored by circulation and light penetration, with support and transitional spaces clustered around a luminous core.

LEVEL 2

Vocabulary Extraction:

- Living room
- Dining area
- Kitchen
- Grand hallway
- U-shaped staircase
- Skylight

Quantity Estimation:

- Living room × 1
- Dining area × 1
- Kitchen × 1
- Grand hallway × 1
- U-shaped staircase × 1
- Skylight × 1

Spatial Relationship Descriptions:

Living, dining, and kitchen zones form a fluid open-plan configuration promoting shared activity. The grand hallway penetrates this floor, linking all functional zones transversally. The central staircase and skylight create a vertical spatial climax at the heart of the plan.

Overall Spatial Impression:

The ground floor emphasizes social interaction through an open layout, unified by a vertically linked core and brightened via natural overhead light.

LEVEL 3

Vocabulary Extraction:

- Bedrooms
- Bathrooms
- Grand hallway

- U-shaped staircase
- Skylight

Quantity Estimation:

- Bedrooms × 2
- Bathrooms × 2
- Grand hallway × 1
- U-shaped staircase × 1
- Skylight × 1

Spatial Relationship Descriptions:

Bedrooms are placed opposite each other, with bathrooms adjacent or en-suite, suggesting privacy zones. The hallway provides connectivity and separation between private quarters. The staircase and skylight at the center act as spatial and luminous anchors.

Overall Spatial Impression:

The upper floor prioritizes privacy and restfulness, organized around a vertically lit spine that balances openness with separation.
